4	<div>مشاوره تحصیلی تحصیلیکو</div> <div>Reading</div> <div>متن زیر را بخوانید و به سوالات خواسته شده پاسخ دهید.</div> <div>Read the passage and answer the questions.</div> <div>Wonders about planets will not finish. If you search the net it shows that every day we find more about planets. We have nine famous planets and we are really interested to know more about them. For example, our earth goes around the sun in one year, while Jupiter goes around it in 12 years because it is farther than the earth. Or Mars's mountains are really famous and another thing about Mars is its red color. There are also some red places on Jupiter. In Mercury at night the weather is so cold and on a day the weather is really hot. Mercury is the only planet with this difference in its weather at day or night. Neptune is the farthest planet but Venus is the nearest. Neptune's windy weather is so amazing. In 2009 people found rings around Saturn. We can put 100000000 earths on these rings. And Venus is the only planet that orbits the Sun clockwise. What about our earth? Its water and the oxygen that defend our lives are interesting things about our earth.</div> <div>About these creations you can study millions of book.</div> <div>clockwise=(در جهت ساعت)</div> <div>43. Jupiter is the farthest planet to the Sun. True False</div> <div>44. There are some red places in Jupiter. True False</div> <div>45. We haveplanets in our solar system. a. five b. nine c. ten d. one</div> <div>46.is the nearest planet to the sun. a. Venus b. Earth c. Pluto d. Moon</div> <div>47. What is interesting about Venus?</div> <div>48. How is the weather in Mercuy?</div> <div>www.Tahsilico.com</div> <div>GOOD LUCK</div>	16
