Speaking a foreign language is what most people want. Every year many people start learning one. Some people try at home with books and tapes. Some use radio or TV programmes; thousands go to evening classes. If they use the language only two or three times a week, it will take some time to learn a language, like language learning at school. Some people try to learn language fast by studying for ۶ hours or more a day. Some travel to the country where the language is spoken to learn it. However, most people do not have enough money to go there. Some people need the language to do their work better.

TRUE or FALSE?

Learning a language at school is fast. T/ F

There are various tools to learn a language. T/ F

Answer the following questions.

How can people learn a language?

Do you think knowing to speak in English is important?

For the human baby, the period of complete dependence on his mother is longer than it is for the young of any animal. Even when the child is able to feed himself, he must still depend on the guidance and protection of his elders for many years to come. One might ask why this function could not be left to some kind of organisations so that parents might be free to do other duties. The answer, of course, lies in the fact that children need more than physical attention. They must have love as well, and this is what family can provide. An unloved child will be unable to love other people as he grows up.

TRUE or FALSE?

The human baby is as long dependent on its mother as baby of any other animal. T/ F

Children who get no love from their parents cannot love others. T/ F
